horse (saddle, bag, tack & harness)

3 taels (money)

Background Details

Ciji is Totally Brave because she has had to be. She is small, easily distracted by others and gets into trouble due to her low willpower. Also, she wants to make a living delving into extremely dangerous places.

She views being Resolute as the most important trait of the virtuous hero. Unfortunately while she views this as the most important trait it is her weakest. The second most important is being Just because no one deserves to be picked on. Truthful, hmm, that is important when dividing spoils up right?

Family and Friends

Ciji's family is known for running a noodle shop. Her mom's recipes are pretty good and her father and two older brothers are hard workers. One of her brothers is really good with numbers and since he has taken over the shop's accounting her family has been able to have a few items like occasional new cloths or meat served in home meals several times a week. Oh, and sending Ciji to school.

Ciji's real name is Shi Gee. Family name is Shi. Mother is Shi Na, father Shi Wei, and brothers Shi Ching and Shi Niu (the numbers brother).

She has a childhood friend (fellow player character), and is a cousin to one of the other player characters.

Plot Hooks

List something that you think is true but you will learn is not.

Ciji believes that the Ming were actually misunderstood. They were powerful sorcerers but only some were tainted by evil. Most of the stories of their evil powers are likely exaggerations made up by historians trying to proclaim their expertise.

Who and why does someone want revenge on you or your family?

There is a young man, Hai Chu, in my school who I've shamed a few times because of my over eagerness to share what I've learned. What I don't know is he comes from a family line descended from the Ming sorcerers. He secretly wishes to crush me. To do so, he will study the ways of the Ming Sorcerers and eventually turn his powers on me.

List something from your past that may come back to haunt you.

I found a Ming artifact, a small bauble anyway in the market at a curio shop. It has a symbol on it that refers to the Hai family. It looks very old. I'm sure it isn't anything significant. I can't wait to see what other artifacts I can find!
